Brief profile	<p>BridgeQuest is a leading provider of offshore research and development outsourcing services. Our R&D lab was established in 1991 and is located in St. Petersburg, Russia. Our mission is to help our clients solve their software R&D challenges by leveraging the power of our Russian engineering talent. We utilize a time-proven methodology of extended R&D teams that produce impressive results. These Extended Teams™ combine the efficiencies and control of our United States based project management process and the economies and superior ROI of offshore outsourcing.</p> <p>BridgeQuest has offices in New York, Research Triangle Park, North Carolina and St. Petersburg, Russia. The BridgeQuest R&D lab, located in St. Petersburg, consists of more than 300 computer scientists and software engineers.</p> <p>BridgeQuest maintains a close working relationship with St. Petersburg State University, allowing us to tap the deep scientific resources of a truly world-class research institution. A large percentage of our R&D staff members hold Ph.D. degrees in computer science and other related disciplines and have attained worldwide recognition in their respected scientific disciplines. Combining this extensive knowledge base with our state of the art project management team, results in innovative, practical solutions for our clients.</p> <p>BridgeQuest's executive team is based in the United States and averages more than 20 years experience in running commercially successful high-tech organizations in North America and Western Europe. We truly understand the business needs and commercial realities of today's business enterprises. We also possess a decade of experience in leveraging offshore R&D teams to support on shore businesses.</p>
